

“Natural Wood Fines”

Spec size 3/8” minus

Description & Process:

- Wood-fines are the screened bi-product of Wonder Mulch, made from large brush
- Feedstock is clean yard trimmings including branches, tree rounds and self-haul drop off. No animal wastes or sludge waste are added.
- The ground up yard trimmings are then screened to a 3/8” inch size with a fine texture
- Wood Fines are a great top dressing mulch that look great on a landscape
- Or these can be used as a bulking agent for back yard composting bins. Add Vision’s Wood Fines to your compost pile.

Application:

- Wood Fines can be applied like a normal top dressing mulch, 2-3 inches on a landscape to retain moisture, protect the soil and provide organic matter back to the soil.

Transforming Local Organics
